This opinion contains indications relating to the following items:

☑ Box No. 1

Basis of the opinion

☑ Box No. II

Priority

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability ☑ Box No. III

Box No. IV

Lack of unity of invention

Reasoned statement under Rule 43bis.1(a)(I) with regard to novelty, inventive step or industrial Box No. V

applicability; citations and explanations supporting such statement

Certain documents cited Box No. VI

Certain defects in the international application ☐ Box No. VII

Box No. VIII Certain observations on the international application

FURTHER ACTION 2.

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this international Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

For further details, see notes to Form PCT/ISA/220.

International application No. PCT/IB2004/000165

	Box I	No. I	Basis of the opinion
1.	With the la	regare ingua	d to the language , this opinion has been established on the basis of the international application in ge in which it was field, unless otherwise indicated under this item.
	k	angua	pinion has been established on the basis of a translation from the original language into the following age , which is the language of a translation furnished for the purposes of international search Rules 12.3 and 23.1(b)).
2.	With neces	regare ssary	d to any nucleotide and/or amino acid sequence disclosed in the international application and to the claimed invention, this opinion has been established on the basis of:
	a. typ	e of r	naterial:
		as	equence listing
		l tab	ele(s) related to the sequence listing
	b. for	rmat o	f material:
		l in v	written format
		l in o	computer readable form
	c. tim	ne of f	iling/furnishing:
		coı	ntained in the international application as filed.
		l file	d together with the international application in computer readable form.
		j fur	nished subsequently to this Authority for the purposes of search.
3.	!	has be	dition, in the case that more than one version or copy of a sequence listing and/or table relating theret een filed or furnished, the required statements that the information in the subsequent or additional is is identical to that in the application as filed or does not go beyond the application as filed, as priate, were furnished.
4.	Addi	tional	comments:

International application No. PCT/IB2004/000165

_	Box	No. II	Priority
1.	×	The fol	lowing document has not been furnished:
		\boxtimes	copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).
			translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).
		Conse	quently it has not been possible to consider the validity of the priority claim. This opinion has neless been established on the assumption that the relevant date is the claimed priority date.
2.		has be	pinion has been established as if no priority had been claimed due to the fact that the priority claim en found invalid (Rules 43 <i>bls</i> .1 and 64.1). Thus for the purposes of this opinion, the international ate indicated above is considered to be the relevant date.
3.	Ado	ditional d	observations, if necessary:

International application No. PCT/IB2004/000165

			the revelled inventive aton and industrial

see form 210

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

No opinion was established in respect of claims 21-34, 37-38, because of the non-establishement of an international search report for said claims, since in response to the invitation (Form PCT/ISA/206) to pay additinal fees the applicant did not pay any additional fees.

Re Item IV

Lack of unity of invention

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1.Claims 1-20, 35,36

A communications method and system, comprising a controller for managing the access to a plurarity of services in a session, by requesting an amount of money to be reserved and by controlling the allocation of said reserved portion between said plurarity of services.

2.Claims 21-34,37,38

A communications method, and system comprising a controller for converting the requested reserved amount of money for accessing a plurarity of services simultaneously, from a first form type to a second form type.

Each group of claims contains a number of technical features defining it's subject matter.

The only feature common to both groups is the "communications method and system comprising a controller used for the reservation of an amount of money for accessing a plurarity of services"

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/IB04/00165

The features defined in the group of claims are not the same or corresponding, that is they have different technical effects related to different technical problems.

The special technical features of Group I solve the objectively determined problem of how to control the allocation of a reserved amount of money between a plurarity of services in a single session in a prepaid environment.

The special technical features of Group II solve the objectively determined problem of how to convert in a prepaid environment, the reserved amount of money for a plurarity of simultaneous services, from a first type of form to a second type of form.

Thus these two groups of inventions do not have any special technical features in common, nor they have any corresponding special technical features as meant by Rule 13.2 PCT, as they relate to different solutions of different objectively determined problems. Hence, Rule 13.1 PCT is not satisfied and the subject matter of the application contains two subjects which are not linked by a single inventive concept.

It is therefore considered that the international application does not comply with the requirements of unity of invention.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: US-A-5 995 822 (SMITH OLA ET AL) 30 November 1999 (1999-11-30)

Document **D1**, which is considered to represent the most relevant state of the art, discloses a prepaid system and method for controlling the access to one or more simultaneous communications, by reserving a first portion of money from the users account when the first communication starts, and reserving a second portion of said

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/IB04/00165

money already depleted by all or some of said first portion from the users account for the second simultaneous communication, from which the subject-matter of claim 1 differs in that since there are simultaneous services accessed in a single session, the reservation of a portion of money from the prepaid amount has to be done at one step for all the services and then allocated to between them.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as how to control the access to a plurarity of services in a single session, in a prepaid environment.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons: the system and method proposed comprises a controller repsonsible for requesting the reservation of a portion of the prepaid amount for the services to be accessed in single session and for controlling the allocation of said reserved portion between said plurarity of services.

The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claims 35,36, which therefore are also considered new/inventive.

Claims 2-20 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VIII

Certain observations on the international application

- Claim 21 does not meet the requirements of Article 6 PCT in that the matter for which protection is sought is not clearly defined, since the term "said second entity" used in the claim is not defined anywhere before in the same claim.
- 2. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document US-A-5 995 822 is not mentioned in the description, nor is this document identified therein.
